

Python Environment Setup Guide (Windows)

Step 1: Open PowerShell as Administrator

- Start Menu → Search **PowerShell**
- Right-click → **Run as Administrator**

Step 2: Check PyEnv installation

```
pyenv --version
```

If it shows a version, continue.

Step 3: Install Python 3.10

```
pyenv install 3.10.11
```

Check installed versions:

```
pyenv versions
```

You should see:

```
3.10.11
```

Step 4: Create a new project folder

Example:

```
mkdir D:\Projects\Python310_Project
```

Go into the folder:

```
cd D:\Projects\Python310_Project
```

Step 5: Set Python 3.10 for this project

```
pyenv local 3.10.11
```

Verify:

```
python --version
```

Expected:

```
Python 3.10.11
```

Step 6: Create virtual environment

Run:

```
python -m venv .venv
```

This creates:

Python310_Project

Step 7: Activate virtual environment

```
.\.venv\Scripts\Activate
```

You should see:

```
(.venv)
```

Example:

```
(.venv) PS D:\Projects\Python310_Project>
```

Step 8: Verify environment

Check Python:

```
python --version
```

Output:

```
Python 3.10.11
```

Check location:

```
where python
```

Expected:

```
D:\Projects\Python310_Project\.venv\Scripts\python.exe
```

```
